

PRIVACYPHONE

IP Telephony Solution for the Prison Cell

© eg / pixelio.de

PrivacyPhone is an intelligently designed, comfortable, and secure telephony solution for the prison cell. It offers inmates the option of making phone calls in privacy, thus giving them the chance to maintain close contact with family and friends. This in fact represents an important prerequisite for inmates' emotional balance and not least for their successful reintegration into society after having served their sentence.

Prison facilities in turn benefit from a centrally controlled telephony solution that eases their staff's workload in many ways: PrivacyPhone allows for its as far as possible independent use by inmates. The central management software PriSec ControlCenter offers maximum surveillance provided by numerous comfortable functions, such as:

PriSec ControlCenter Highlight Administration and Monitoring Features:

- assignment of inmates to predefined groups with predefined permissions and restrictions
- creating of white and black list for calling numbers
- listen-in and recording feature
- real-time control of phone calls for releasing, declining, terminating and listen-in of calls
- billing via virtual inmates' credit accounts

Optional Services:

- 24/7/365 pastoral care hotline
- collect calls (family credit account)

Technical Details and Safety Features:

- wall mountable box with USB connection and USB handset, also usable as set-top table box
- transparent plastic housing (reliably preventing the hiding of smuggled goods)
- case open detection and sabotage alarm against vandalism and manipulations
- secured USB port, no connection of third party devices
- connection via LAN, EoP (Ethernet over Power) or coax cabling
- low hardware maintenance effort and maximum availability due to exclusive use of high-quality components
